Dear Bill and Libby

I'm very keen to write a letter of recommendation for you to present to the Wyaralong Dam project team. I've always admired Bill's ability to design race courses for downhill and cross country events as well as event village set up.

Bill's designed and constructed courses for National level races in downhill and cross country for many years and even dual slalom (on one occasion). Kooralbyn, Fellcrag and now Canungra trail networks were developed by Bill almost singlehandedly.

I've attended many cross country events such as the 24 hour, 12 hour and 6 hours races you held yearly since 2000. The mix of climbing and descending, flowing single track and technical features always left riders with a smile. And they came back for more, year after year.

Over the years, you've provided some of the best downhill courses in south east Queensland. With your expertise in state of the art timing and results service, riders always knew they were also getting a very accurate timing service.

When I look at trail construction expertise available in the region of the Wyaralong Dam, I can think of no better person to assist with the development of MTB trails outlined in the Draft Recreation Master Plan.

Yours sincerely

Gillian Duncan
